WORK EXPERIENCE

Product Manager, FlashSpread: A BeSmartee Company — 2022-Present

- Was hand-picked by the BeSmartee CEO to step in as Product Manager and assist the Flashspread General Manager when the company was acquired.
- Focused on enhancing existing functionality and designing new features to make FlashSpread the best docs-to-data system for Commercial Lending.
- Coordinated with the development lead to ensure the team of 5 developers understood and met business requirements every agile sprint cycle.

Product Manager, BeSmartee — 2021-Present

- Worked alongside a team of other Product Managers to design new functionality for the BeSmartee Mortgage Point-of-Sale product.
- Led a dedicated team of developers and testers on a new Fee Management Product, which I solely designed, that allowed BeSmartee to secure deals we may have not otherwise. Additionally, this system was a pivotal first-step in new processes and procedures around TDD and CI/CD workflows.

Lead Developer (Implementation), BeSmartee — 2019-2021

- Managed a team of 3 other developers and saw to their professional and technical growth.
- Introduced processes and procedures to improve implementation efficiency from request to delivery.
- Individually managed our second largest client, at the time, and led them through a 10+ legacy version upgrade with no issues.
- Led the design and development of a new product which quickly and dynamically implemented functionality for new clients via custom workflows. This also introduced the Laravel framework and modern php design to the engineering department.

Web Developer, BeSmartee — 2017-2019

- Focused on building new features and fixing bugs that were reported by clients.
- Led the charge to introduce a better source-control management system as well as solid development practices, via Git Agile and Scrum, across the entire engineering department.

Web Developer, Freelance — 2014-2017

- Grew and applied my development skills via static sites and small web applications for a few clients while attending university.
